

The right care when you need it most through Teladoc

Telemedicine services allow members to have access to consultations with a licensed physician 24/7 via phone call, video chat or email, no matter where they are. This benefit can save on costs accumulated with unnecessary trips to the clinic or ER and can help encourage members to receive treatment before their diagnosis becomes chronic.

All of the telemedicine services in the table below are available and included for \$4 PEP. When services are incurred, the service will be billed as a claim to the health plan, according to the pricing below. It is recommended that General Medical Consultations be offered at no cost to employees but you do have the ability to set member copays for dermatology and mental health services.

Advantages of Teladoc

- Avoid urgent care and ER visits
- No transportation time or costs
- No need to take time off of work
- Lower costs
- Any person in the household can use Teladoc
- Avoids exposure that comes with waiting rooms
